

In the Claims:

- 1.(original) A bottle for dispensing two liquids, the bottle comprising two reservoirs, one for each liquid, a nozzle through which the liquids are dispensed from the bottle, a passageway from each reservoir leading out of the nozzle, and a deflector plate between the two passageways and projecting from the end of a nozzle in a direction substantially parallel to the direction of flow from the nozzles thereby causing the liquid leaving one passageway to be deflected towards the liquid leaving the other passageway so that the two liquids first mix once they have passed the deflector plate.
- 2.(original) A bottle according to claim 1, wherein the passageways are arranged in a side-by-side relationship.
- 3.(currently amended) A bottle according to claim 1 ~~or claim 2~~, wherein a single deflector plate is arranged to deflect the liquid from both passageways.
- 4.(currently amended) A bottle according to claim 1 ~~or claim 2~~, wherein only one passageway is provided with the deflector plate.
- 5.(currently amended) A bottle according to claim 1 ~~or claim 2~~, wherein each passageway has its own deflector plate.
- 6.(currently amended) A bottle according to claim 1 ~~any preceding claim~~, wherein the free end of the deflector plate is tapered in the direction of flow.
- 7.(currently amended) A bottle according to claim 1 ~~any preceding claim~~, wherein the two passageways are substantially parallel in the nozzle.

- 8.(currently amended) A bottle according to claim 1 ~~any one of the preceding~~
~~claims~~, wherein the nozzle is angled in respect to a main axis of the bottle.
- 9.(currently amended) A bottle according to claim 1 ~~any one of the preceding~~
~~claims~~, containing two liquids having a viscosity of less than 1000 Cps, ~~and~~
~~preferably less than 500 Cps.~~
- 10.(currently amended) A bottle according to claim 1 ~~any one of the preceding~~
~~claims~~ containing two liquids which will mix to form a detergent.
- 11.(original) A nozzle through which two liquids are dispensed, the nozzle being
provided with two passageways and a deflector plate in the nozzle between the
two passageways and projecting from the end of the nozzle thereby causing at
least one of the liquids leaving the passageways to be deflected towards the other
so that the two liquids first mix once they have passed the deflector plate.
- 12.(new) A bottle according to claim 9 containing two liquids having a viscosity of
less than 500 Cps.
